	Inventory Methodology
	6.1.6.7 1.1.6.1.6.16.16.16
PWS Name: Clallam Bay/Sekiu	
PWSID: 13200F	
Enter Date Last Updated:	10/15/24

Purpose of this worksheet: For water systems to do	ocument the methods and resources they used to develop and update their inventory.
Part 1: Historical Records Review	
Type of Record	Describe the Records Reviewed for Your Inventory and Indicate Your Level of Confidence (e.g., Low, Medium, or High)
Previous Materials Evaluation Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.	LOCATIONS OF PREVIOUS LCR SAMPLING - MEDUIM
2. Construction Records and Plumbing Codes Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.	1986 SAFE DRINKING WATER ACT LEAD SERVICE BAN, LOCATIONS CONSTRUCTED & CONNECTED AFTER THE LEAD BAN ARE ASSUMED NON-LEAD - HIGH CONFIDENCE.
Water System Records Examples: Capital improvement plans. Standard operating procedures. Engineering standards.	CPUD GENERAL SPECIFICATIONS, WATER SYSTEM CONSTRUCTION DOCUMENTS - HIGH CONFIDENCE.
4. Distribution System Inspections and Records Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.	COMPLETED SERVICE ORDERS, SERVICE AS-BUILTS (METER INSTALLATION RECORDS) - HIGH CONFIDENCE
5. Additional Records Required by Your State	
6. Other Records	
	Named Orașii a
Part 2: Identifying Service Line Material During 1. During which normal operating activities are you	collecting information on service line material? Check all that apply.
 Water meter reading ✓ Water meter repair or replacement ✓ Service line repair or replacement If "Other", please explain:	 ✓ Water main repair or replacement ☐ Backflow prevention device inspection ☐ Other
, , , , , , , , , , , , , , , , , , , ,	
Did you develop or revise standard operating produring normal operation? If "Yes", please describe:	cedures to collect service line material information No
No formal revision to SOP - operators are encoura	ged to note service line material when possible in service order notes.
Part 3: Service Line Investigations	
1. Identify the service line investigation methods yo not specified by the state under 40 CFR §141.84(a)(ur system used to prepare the inventory (check all that apply). If a water system chooses an investigation method 3)(iv), state approval is required. <i>Note that investigations are not required by the LCRR but can be used by d gather information when service line material is unknown.</i>
 ✓ Visual Inspection at the Meter Pit ☐ Customer Self-Identification ☐ CCTV Inspection at Curb Box - External ☐ CCTV Inspection at Curb Box - Internal ☐ Water Quality Sampling - Targeted ☐ Water Quality Sampling - Flushed 	 Water Quality Sampling - Other ✓ Mechanical Excavation Vacuum Excavation Predictive Modeling ✓ Other

☐ Water Quality sampling - Sequential If "Other", please explain:
Statistical Approach utilized for evaluation of uknown service lines in accordance with WA DOH Guidance Document 331-723.
2. If "Predictive Modeling", please briefly describe the model and inputs used:
3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?
107 service locations were identified with construction dates prior to the SDWA Lead Ban. 22 of these sites were recently rebuilt as part of an extensive water main replacment project. Inspection reports and operator interviews confirmed there was no lead service lines identified at these 22 serives. The 85 remaining service locations were initially classified as unknown, these locations were randomized and 17 were physically inspected to ensure a confidence level of 95% in accordance with WA DOH Guidance Document 331-723. Locations were then classified as non-lead in accordance with statistical approach.

Inventory Summary

PWS Name: Clallam Bay/Sekiu

PWSID: 13200F

Enter Date Last Updated: 10/15/24

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information	
1. Is this the Initial Inventory or an Inventory Update?	Initial Inventory
2a. Who owns the service lines in your system? <i>If other, please explain below.</i>	Ownership is split, meaning that the system owns and portion and the
za. Who owns the service lines in your system: If other, prease explain below.	customer owns a portion
2b. Is there documentation that defines service line ownership in your system,	Yes
such as a local ordinance? If yes, please describe below and explain where	
ownership is split (e.g., property line, curh stop).	

System owness service line from water main to water meter/setter. Customer owns service line from water meter box to building. Detailed in the CPUD General Specifications.

3a. Describe when lead service lines were generally installed in your system.

N/A

3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.

SDWA 1986

4. Do you have lead goosenecks, pigtails or connectors in your system?

5. What is your overall level of confidence in the inventory (i.e., "Low", "Medium", or "High.") Please explain your rationale below.

High - No records of lead services lines, large quantity of connections after 1986 SDWA Lead ban and no lead service lines have ever been encountered by operators in the field. Statistical Approach utilzied for inventory, no lead identified in service line survey.

Part 2. Inventory Format

Describe your inventory format in the space provided below (e.g., the **Detailed Inventory** worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable. **Note that the state may require you to submit your detailed inventory of each service line in your distribution system.**

Detailed inventory worksheet.

Part 3. Inventory Summary Table ¹

If you are using the **Detailed Inventory** worksheet, the classifications you select in the Column "Entire Service Line Material Classification" (Column X) will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines in the aquacolored cells. **Remember this is the classification for the entire service line.**

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	406
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
	TOTAL	406

Notes

¹This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR ("a portion of pipe that is made of lead, which connects the water main to the building inlet") (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.

PVS Name: Cubine Bay/Skiu PVS Name: Cubine Bay/Skiu PVS Name: Cubine Bay/Skiu PVSC 12000' Date tast Quidence 14/15/78024

Purpose of this worksheet: To provide a customizable format water systems can use to track materials for each service line in their distribution system.

General Instructions: Each now in this worksheet represents one service line connecting the water main to the customer's plumbing. The worksheet includes required and recommended elements, the columns with the aqual shading are required by the LOIK Systems can customize by adding or deleting cultum, important notes for each cultum are in low 3.2 just loss the Template indectacions worksheet for detailed instructions. Note that some can here panes to enable them to see the handlings and once when extending action in investment of expending elements of expending expending expenditures. Public Accessibility Documentation
PWS Name: Clallam Bay/Sekiu
PWSID: 13200F
Enter Date Last Updated: 10/15/24
Purpose of this worksheet: For systems to provide documentation to states on how they met the public accessibility requirements of the LCRR.
1. Select the location identifiers that you use for your service line inventory. Check all that apply.
☑ Address
Street
Block
☐ Intersection
Landmark
☐ GPS Coordinates
☑ Other
If "Other", please describe:
Service location number used in customer billing system.
2. Does <i>every service line</i> have a location identifier? Yes
If "No", explain. Remember that location identifiers are required for service lines that are lead and galvanized requiring replacement.
3. How are you making your inventory publicly accessible? Check all that apply. Remember that if your system serves > 50,000 people, you must provide the
inventory online.
✓ Interactive online map
☐ Static online map
✓ Online spreadsheet
Printed service line map
☐ Printed service line map ☐ Printed tabular data
Printed tabular data

System serves <50,000 people. Hard copy available upon request. Online map will be available on Oct 16, 2024 although not required based on population.

If "Other", please describe:
