

PWS Information

Purpose of this worksheet: For water systems to document basic system information.

Facility Information

Water System Name:

PA COMPOSITE

PWSID:	Population Served (number of people):	Number of Service Connections:	PWS Type:
432960	8,785	3566	<input checked="" type="checkbox"/> CWS <input type="checkbox"/> NTCWS

If you are a CWS, do multi-family residences comprise at least 20% of the structures you serve? Yes

Mailing Address

Street or P.O. Box:

PO BOX 1000

City or Town:	State:	Zip Code:
CARLSBORG	WA	98324

System Contact Person

Name:	Title:
BOWEN KENDRICK	WATER & WASTEWATER MANAGER
Telephone:	Email:
360.565.3459	BKENDRICK@CLALLAMPUD.NET

Person Who Prepared Inventory (if different from above)

Inventory Methodology

PWS Name: PA COMPOSITE

PWSID: 432960

Enter Date Last Updated: **10/15/24**

Purpose of this worksheet: For water systems to document the methods and resources they used to develop and update their inventory.

Part 1: Historical Records Review

Type of Record	Describe the Records Reviewed for Your Inventory and Indicate Your Level of Confidence (e.g. , Low, Medium, or High)
1. Previous Materials Evaluation <i>Example: Locations of Tier 1 lead tap sampling locations that are served by a lead service line.</i>	LOCATIONS OF PREVIOUS LCR SAMPLING - MEDIUM
2. Construction Records and Plumbing Codes <i>Examples: Local ordinance adopting an international plumbing code. Permits for replacing lead service lines.</i>	1986 SAFE DRINKING WATER ACT LEAD SERVICE BAN, LOCATIONS CONSTRUCTED & CONNECTED AFTER THE LEAD BAN ARE ASSUMED NON-LEAD - HIGH CONFIDENCE.
3. Water System Records <i>Examples: Capital improvement plans. Standard operating procedures. Engineering standards.</i>	CPUD GENERAL SPECIFICATIONS, ORIGINAL WATER SYSTEM DOCUMENTS - HIGH CONFIDENCE.
4. Distribution System Inspections and Records <i>Examples: Distribution system maps. Tap cards. Service line repair/replacement records. Inspection records. Meter installation records.</i>	COMPLETED SERVICE ORDERS, SERVICE AS-BUILTS (METER INSTALLATION RECORDS) - HIGH CONFIDENCE
5. Additional Records Required by Your State	
6. Other Records	

Part 2: Identifying Service Line Material During Normal Operations

1. During which normal operating activities are you collecting information on service line material? Check all that apply.

- | | |
|--|--|
| <input type="checkbox"/> Water meter reading | <input checked="" type="checkbox"/> Water main repair or replacement |
| <input checked="" type="checkbox"/> Water meter repair or replacement | <input type="checkbox"/> Backflow prevention device inspection |
| <input checked="" type="checkbox"/> Service line repair or replacement | <input type="checkbox"/> Other |

If "Other", please explain:

2. Did you develop or revise standard operating procedures to collect service line material information during normal operation? No

If "Yes", please describe:

No formal revision to SOP - operators are encouraged to note service line material when possible in service order notes.

Part 3: Service Line Investigations

1. Identify the service line investigation methods your system used to prepare the inventory (check all that apply). If a water system chooses an investigation method not specified by the state under 40 CFR §141.84(a)(3)(iv), state approval is required. **Note that investigations are not required by the LCRR but can be used by systems to assess accuracy of historical records and gather information when service line material is unknown.**

- | | |
|--|---|
| <input checked="" type="checkbox"/> Visual Inspection at the Meter Pit | <input type="checkbox"/> Water Quality Sampling - Other |
| <input type="checkbox"/> Customer Self-Identification | <input checked="" type="checkbox"/> Mechanical Excavation |
| <input type="checkbox"/> CCTV Inspection at Curb Box - External | <input checked="" type="checkbox"/> Vacuum Excavation |
| <input type="checkbox"/> CCTV Inspection at Curb Box - Internal | <input type="checkbox"/> Predictive Modeling |
| <input type="checkbox"/> Water Quality Sampling - Targeted | <input checked="" type="checkbox"/> Other |
| <input type="checkbox"/> Water Quality Sampling - Flushed | |

Water Quality sampling - Sequential

If "Other", please explain:

Statistical Approach utilized for evaluation of unknown service lines in accordance with WA DOH Guidance Document 331-723.

2. If "Predictive Modeling", please briefly describe the model and inputs used:

3. How did you prioritize locations for service line materials investigations? For example, did you consider environmental justice and/or sensitive populations, did you use predictive modeling, and/or did you target areas with high number of unknowns?

935 service locations were identified with construction dates prior to the SDWA Lead Ban and initially classified as unknown. These locations were randomized and 196 (OVER 20%) were physically inspected to ensure a confidence level of 95% in accordance with WA DOH Guidance Document 331-723.

Inventory Summary

PWS Name: PA COMPOSITE

PWSID: 432960

Enter Date Last Updated: **10/15/24**

Purpose of this worksheet: For water systems to provide a summary of their service line inventory, including information on ownership, inventory format, and the number of service lines for each of the four required materials classifications.

Part 1. General Information

1. Is this the Initial Inventory or an Inventory Update ?	Select One
2a. Who owns the service lines in your system? <i>If other, please explain below.</i>	Ownership is split, meaning that the system owns and portion and the customer owns a portion
2b. Is there documentation that defines service line ownership in your system, such as a local ordinance? <i>If yes, please describe below and explain where ownership is split (e.g., property line, curb stop).</i>	Yes
System owns service line from water main to water meter/setter. Customer owns service line from water meter box to building. Detailed in the CPUD General Specifications	
3a. Describe when lead service lines were generally installed in your system.	
No record of lead service lines ever being used within this system.	
3b. When were lead service lines banned in your system? Reference the state or local ordinance that banned the use of lead in your system.	
SDWA 1986	
4. Do you have lead goosenecks, pigtails or connectors in your system?	No
5. What is your overall level of confidence in the inventory (<i>i.e.</i> , "Low", "Medium", or "High.") Please explain your rationale below.	
High - No records of lead services lines, most of system and most structures build after 1986 SDWA Lead ban. Statistical Approach utilized for inventory, no lead identified in service line survey.	

Part 2. Inventory Format

Describe your inventory format in the space provided below (*e.g.* , the **Detailed Inventory** worksheet, custom spreadsheet, GIS map). Provide the filename and/or web address if applicable. **Note that the state may require you to submit your detailed inventory of each service line in your distribution system.**

Detailed inventory worksheet.

Part 3. Inventory Summary Table ¹

If you are using the **Detailed Inventory** worksheet, the classifications you select in the Column "Entire Service Line Material Classification" (Column X) will be used to calculate the total number of service lines for each of the four material classifications below. Otherwise, enter the number of service lines in the aqua-colored cells. **Remember this is the classification for the entire service line.**

Service Line Material Classification	Definition	Total Number of Service Lines (REQUIRED to be reported under the LCRR)
Lead	Any portion of the service line is known to be made of lead. ²	0
Galvanized Requiring Replacement (GRR)	The service line is not made of lead, but a portion is galvanized and the system is unable to demonstrate that the galvanized line was never downstream of a lead service line.	0
Non-Lead	All portions of the service line are known NOT to be lead or GRR through an evidence-based record, method, or technique.	3,566
Lead Status Unknown	The service line material is not known to be lead or GRR. For the entire service line or a portion of it (in cases of split ownership), there is not enough evidence to support material classification.	0
TOTAL		3,566

Notes

¹This summary table is for reporting material for the entire service line connecting the water main to the customer's plumbing. See the **Classifying SLs** worksheet for additional guidance on assigning a materials classification to the entire service line when ownership is split. Remember that systems must track the system-owned and customer-owned portions separately in their inventory.

² A lead-lined galvanized service line is consistent with the definition of an LSL under the LCRR (“a portion of pipe that is made of lead, which connects the water main to the building inlet”) (40 CFR §141.2) and must therefore be classified in the inventory as an LSL. Do NOT, however, count non-lead service lines with a lead gooseneck or pigtail as lead service lines unless required by your state.

Location Information										System-Owned Portion											Customer-Owned Portion								Other Potential Sources of Lead			Additional Information to Assign Tap Monitoring/Tiering						Lead Service Line Replacement (LSLR)	
Unique Service Line ID	Location Identifier		Sensitive Population? (Yes/No)	Disinfectant Neighbored? (Yes/No)	System-Owned Portion Service Line Material Classification	If Non-Lead in Columns C, Was Material Ever Previously Lead?	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	If "Yes" Service Line Material Was Field Verified:		Notes	Customer-Owned Portion Service Line Material Classification	Service Line Installation Date	Service Line Size	Basis of Material Classification	Was the Service Line Material Field Verified?	If "Yes" Service Line Material Was Field Verified:		Notes	Entire Service Line Material Classification	Is there a Lead Connector?	Is there Lead Solder in the Service Line?	Describe Other Fittings and Equipment Connected to the Service Line that Contain Lead	Building Type Connected To Service Line	Point of Entry on Point of Use Treatment Present?	Does the Interior Building Plumbing Contain Copper Pipes with Lead Soldered Joints? Year Older Lead Ban (Generally 1986 - 1988)?	Current LCS Sampling Status	Date of System-owned LSLR	Date of Customer-owned LSLR								
	Street Address	Other Location Identifier									Select Yes if arriving subpopulation, i.e., day care, school, multi-family home, if any other, describe in the Notes field	Select Yes if no drop down list, "Describe in the Notes Field"							Select Yes or No	Select option from drop down list, if "Other," describe in the Notes Field												Enter approximate date of field verification or state that the record was updated	Can use this field for documenting additional relevant information, including when classification changes.	Select Yes or No	Select option from drop down list, if "Other," describe in the Notes Field	Enter approximate date of field verification or state that record was updated	Can use this field for documenting additional relevant information, including when classification changes.		
A Unique ID is recommended for each service line.
